

THE Ergonomics society

Maritime Ergonomics Special Interest Group (MarESIG)

The Maritime Ergonomics Special Interest Group (MarESIG) is run by the Ergonomics Society and operated by the maritime ergonomics community to provide guidance to the maritime community on ergonomic issues affecting the design, build and operation of marine transportation in conjunction with marine professional societies and organisations.

It is proposed to develop an issues register for use by stakeholders in the maritime community. Any output with Ergonomics Society approval will appear on its website <http://www.ergonomics.org.uk>

An interactive website at <http://www.maresig.org> has been started to generate the material for the issues register. It provides a forum for the discussion of human element issues, with a view to informing regulation, design and operation. Technical contributions are very welcome. Initial topics are:

- Bridge design;
- Bridge standards;
- Incident analysis;
- Slips, trips and falls;
- Information design.

A page still to be created ?

Click on the question mark to start a new page.

Screen 4 – Register so you can edit material

Your "WikiName" will be generated automatically here, e.g.

BrianSherwoodJones, which can be used when editing, and supplying comments.

Screen 5 – A page in 'edit' mode

The editing area. Plain text is fine for contributions. Previous versions of the page will be saved automatically.

Save changes after editing.

To use the 'edit' mode, click the Edit button at the top or bottom of the page. You will be asked for your WikiName and password. An edit version of the page will appear.

The co-ordinator is Brian Sherwood Jones who can be contacted at brian@processforusability.co.uk
